Get tools and skills to make your **#MillionDollarIdea** a reality.

COURSE DETAILS

Technology and computer skills are necessary for all employees today. Even if the career you desire does not revolve around computers, your daily activities will most likely require the access to information and communication tools to accomplish tasks and process the information need for your job.

Some of the exciting careers within the Information, Communication and Technology include Software and Programming, which is the process of developing software to meet the requirements of the end users (stakeholders). This can contain job roles such as Systems Analysts, Programmers, Developers and more.

Information Technology is an exciting industry, and the Australis College Faculty of IT is an innovative approach to delivering IT learning for the new millennium.

Graduates from our IT Faculty will gain broad skills enabling them to launch into the industry as an IT Consultant, a member of an IT firm or agency, or within an IT department at a large organisation. Alternatively, graduates may start their own Mobile App business development company.

YOU'LL LEARN TO*:

- Develop apps from conception to Android store
- How to integrate other stakeholders into projects
- How and where to pitch for funding
- Full development suit, Java, Eclipse, Trello, Git Etc.
- Industry involvement
- Networking opportunities with industry

**Refer to Australis College website for full list of units.*

ENTRY REQUIREMENTS

Before enrolment, all prospective students complete a short phone interview and, if necessary, a Core Skills Assessment to ensure they have the basic skills needed to be successful in completing the qualification.

There are no general entry requirements for this course, and you may enrol into this course at any time and begin studying shortly after enrolment, however if you wish to apply for a loan or funding type to pay for your tuition fees, there will be additional eligibility and entry criteria required.

OTHER REQUIREMENTS

This course requires your computer to meet certain specifications; please visit the course page on our website to find out more.

CAREER OPPORTUNITIES

This course gives you a start in one of the world's fastest growing IT employment sectors by learning how to develop apps for mobile devices.

In this course, you will develop apps for Google Android using the industry's leading development platforms and tools including the Eclipse IDE, Android Studio, Java JDK, Android SDK and Git. You will commence by studying core topics such as programming, project management and trends in mobile app development, and conclude with a core project where you will have the option to design an app that you can commercialise.

The mobile app industry has seen an explosive growth in employment, with 9.4% of all IT jobs in Australia now related to the development, maintenance or support of mobile platforms, and further high growth is predicted. (Source: www.startupsmart.com.au)

The industry is also rapidly seeing the rise of app support in technology as part of the Internet of Things (IoT), and it is expected that skills used in the mobile industry will transfer to smart washing machines, sensors, smart cars and much more!

GET THE AUSTRALIS ADVANTAGE

Australis College offers 'job ready training, today' and all of our training is purpose built with that in mind – to ensure you are highly skilled and ready to enter the workforce.

What is the Australis Advantage?

- Industry Expert Trainers.
