Define your Web Pathway into a Career for the future

WHY AUSTRALIS?

- Learn from industry leading expert trainers
- The flexibility of online learning
- Flexible payment options and payment plans available
- Extensive access to your trainer

BECOME QUALIFIED IN WEBSITE DEVELOPMENT

Websites are a very important aspect of all industries today, and with the explosive growth in e-business worldwide they will only become more so. Because of this, industry need for skilled web developers remains high and will only continue to increase.

The web is also a field that encourages and rewards creative expression and web development is an avenue for both your technical and creative abilities because it includes visual and interaction design alongside technical development.

This means that web developers are like artists providing for both the functionality and attractiveness of a website, drawing the online customer in and helping to maintain their loyalty – all important elements within e-business.

This web development course will give you the skills to design, build and maintain websites for customers using the latest web technologies.

You will learn how to build beautiful responsive sites for clients, working to industry standards using cutting edge web technologies. The skills learned will enable you to work either independently or as part of a web team. You will work through all stages of a web development project including liaising with a client, designing, building, testing and deploying a responsive website. Use the knowledge you gain to build your own website, or you can work independently or as part of a web team to build sites for clients.
