

HLT60112 **Advanced Diploma of Western Herbal Medicine**

This course was removed as a Nationally Recognised VET Qualification 4 years ago and the train out period for this qualification ended on 31st December 2018.

As a result, Australis College are no longer able to provide/offer this qualification to the market.

If, however you are wanting to study an Industry-Recognised Qualification, which will enable you to become a Western Herbal Practitioner, obtain the required insurances and be a member of a recognised Industry Body then Australis would recommend that you consider studying with a high quality training organisation called **Switch on Health**.

Australis has no association with **Switch on Health**, however they are a leading provider of Natural health training Qualifications which have been accredited by Australia's largest Natural Health Industry Body, the **Australian Traditional Medicine Society (ATMS)**.

Switch on Health offer a course in Western Herbal Medicine, which has been Accredited by the ATMS and therefore if you undertake the course you will be able to practice as a recognised Western Herbal Practitioner.

We recommend that you visit **Switch on Health's** website - www.switchonhealth.com.au for more information or alternatively send them an email to info@switchonhealth.com.au.
